

“Web-based visualization and corpus management for language modeling”

1st Weekly meeting

On November 5, we met with the tutor for 30 minutes to set a weekly meeting time and elect a leader to contact the customer. On 10th November our group have met with customer. The customer gave a very detailed presentation at our first meeting, and the team already has some good ideas about what we need to do and how to do it. The customer also gave team Leader a link to the existing GUI. He is exploring it and will discuss it with the rest of the group during the next meetings.
