

Paper Prototype: Delete LM

The researcher logs into the 'LSVLM' GUI website (see Use Case 1).

The researcher selects 'Language Models'.
The system displays the language model index page.

The researcher selects a language model.
The system displays the language model metadata page.

The screenshot shows a web browser window with the URL <https://lm.lsv.uni-saarland.de/lm/32/>. The browser's address bar and tabs are visible. The page has a blue header with the LSVLM logo and navigation links: Corpus Management, Language Models, and Run Experiments. The user is signed in as Clayton Greenberg. The main content area is titled 'View LM' and contains a table with the following data:

Name	ptb0.9-0.9-0.7
Uploaded By	Clayton Greenberg
Uploaded on	April 14, 2015, 2:52 p.m.
Description	

Below the table, there are two buttons: 'Download .lm file' and 'Download .arpa file'. At the top of the page, there are four buttons: 'Copy LM', 'Edit LM', 'Delete LM Record and Files', and 'Delete LM Record Only'.

The researcher selects “Delete LM Record and files” or “Delete LM Record Only”
The system displays the warning message: “Are you sure you want to purge/delete LANGUAGE_MODEL_NAME?”

Train LM

The page at lm.lsv.uni-saarland.de says:

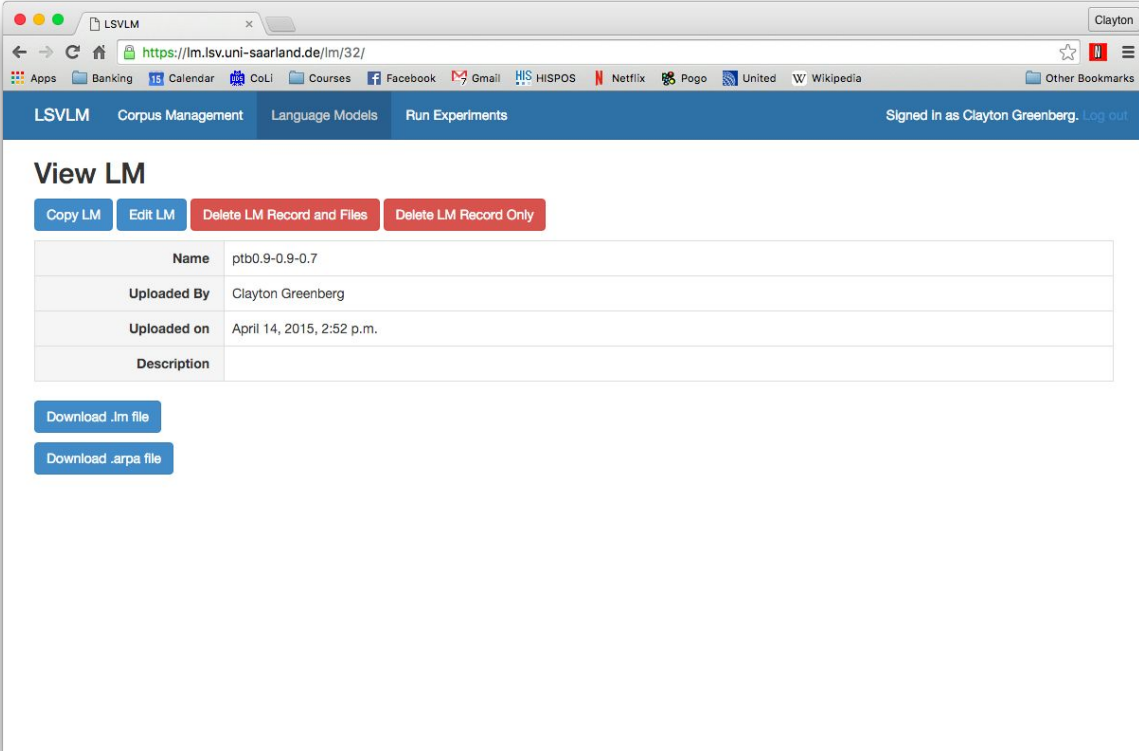

Are you sure you want to purge ptb0.9-0.9-0.7 (Copy)?

☐ Prevent this page from creating additional dialogs.

Cancel

OK

If the researcher selects 'Cancel' on the warning message - the system does not delete anything and remains on the metadata page for the language model.

The screenshot shows a web browser window with the URL <https://lm.lsv.uni-saarland.de/lm/32/>. The page title is "View LM". The user is signed in as Clayton Greenberg. The page contains a table with the following information:

Name	ptb0.9-0.9-0.7
Uploaded By	Clayton Greenberg
Uploaded on	April 14, 2015, 2:52 p.m.
Description	

Below the table, there are two buttons: "Download .lm file" and "Download .arpa file".

The researcher selects “OK”.

The system deletes the record of the language model.

If the appropriate button was selected, the system deletes the configuration file and the trained model if it exists.

The system displays the language model index page.
