# Paper Prototype: Corpus Management: Edit corpus
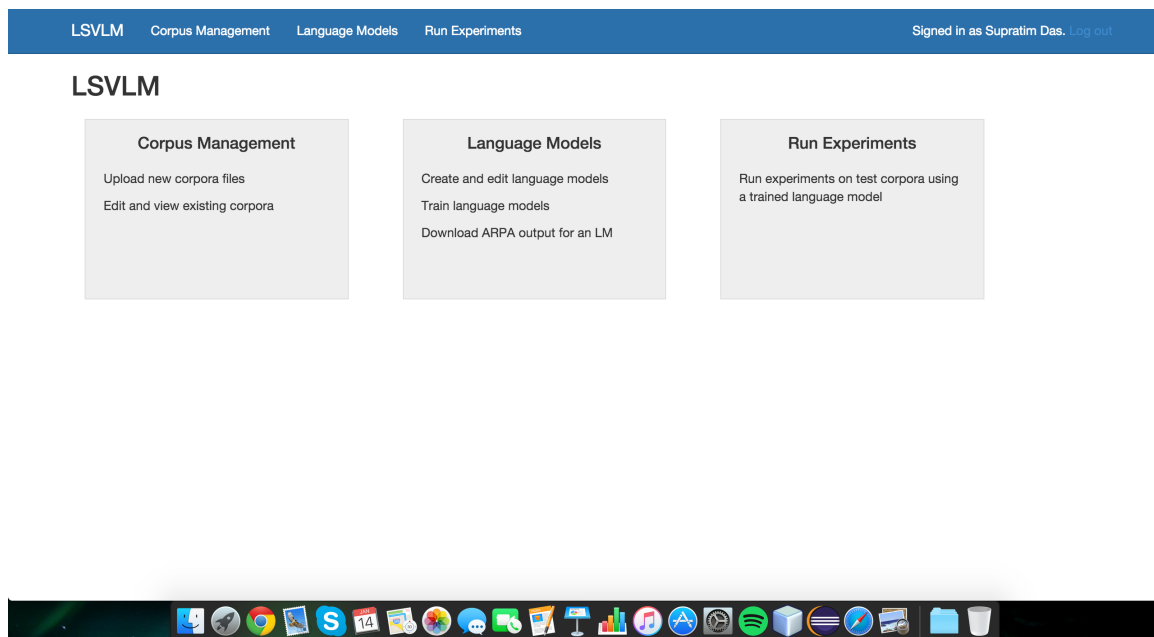

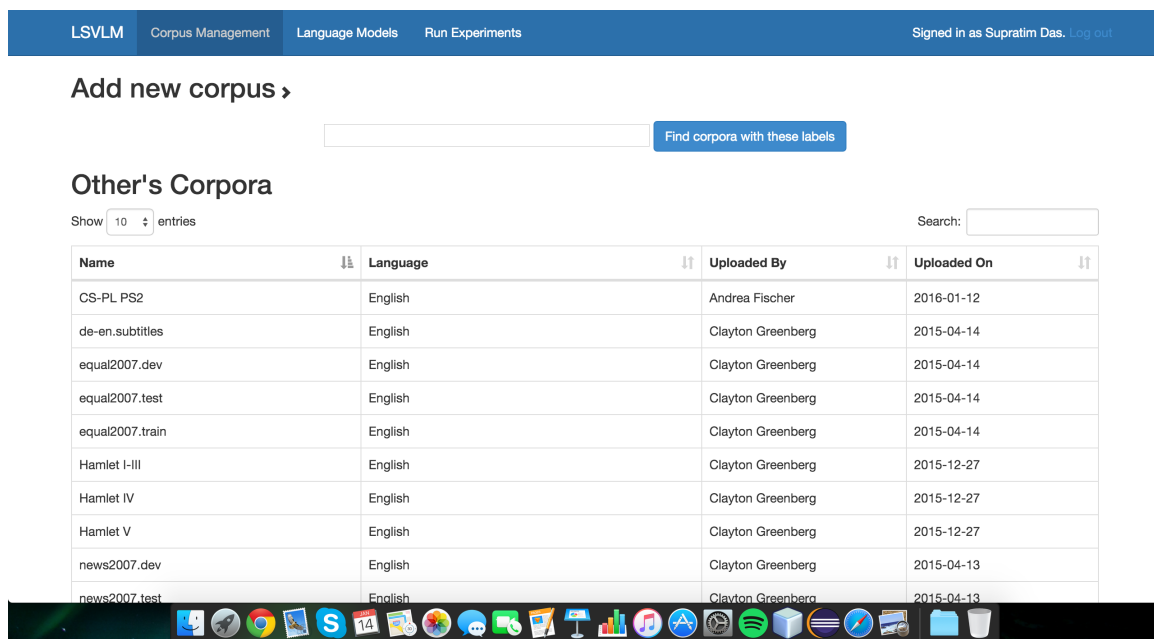

1. The researcher logs onto the 'LSVLM' GUI website.

2. The researcher enters his username and password

# 3. The system displays function groups, namely, Corpus Management, Language Models, Run Experiments.

# 4. The researcher selects "Corpus Management".

5. The researcher selects the corpora he/she wants to delete. But as this corpora isn't uploaded by the researcher, he/she can't delete it.

6. The researcher now selects his/her own corpora and the delete button appears. (Anyone one of them)

## 7. The researcher now deletes the corpus after confirming the delete. The following page appears again.
